

NAJIH NOWSHAD

Bengaluru, India

☎ + (91) 6282979569 ✉ najinowshad@gmail.com  [najihnowshad](https://www.linkedin.com/in/najihnowshad)

Professional Summary

Emerging AI Engineer and Data Scientist with a solid academic foundation in Artificial Intelligence, Machine Learning, and Data Science Analytics. Skilled in building intelligent systems that combine predictive modelling, deep learning, and data-driven insights to solve complex real-world problems. Proficient in Python, R, SQL, TensorFlow, and scikitlearn, with experience in developing end-to-end pipelines for data preprocessing, model training, and deployment. Passionate about leveraging AI not just for automation, but for intelligent decision-making and human-centric innovation. Known for a strong analytical mindset, quick adaptability, and a deep curiosity for cutting-edge technologies driving the future of AI and data science. Eager to contribute to innovative, data-driven teams and continuously learn in fast-paced environments

Education

MES College Of Engineering Kuttippuram

B.Tech Artificial Intelligence and Data Science

Nov 2020 – Jun 2024

Kuttippuram, Kerala

The Model School , Abu Dhabi, UAE

Grade 12 (Kerala Board of Higher Secondary Examinations), Percentage: 82%

2020

Abu Dhabi

The Model School , Abu Dhabi

Grade 10 (Kerala Board of Public Examinations), Grade: A+

2018

Abu Dhabi, UAE

Experience

AI Engineer — Reap Studio

Jul 2025

- Developed and deployed AI-powered virtual try-on features for Reflaire using Python, enhancing user experience with real-time image processing and personalization.
- Built and maintained scalable APIs using FastAPI, enabling seamless communication between AI models, frontend, and third-party services.
- Integrated WhatsApp Cloud API for automated notifications and customer engagement workflows, improving response rates and operational efficiency.
- Produced technical documentation for AI models, API endpoints, and integration processes, facilitating easier onboarding and team collaboration.

Data Science Ai Intern — Future Optima IT Solutions

Jul 2024-May 2025

- Assisted in data cleaning, preprocessing, and transformation for machine learning models.
- Developed predictive models using statistical methods and machine learning algorithms.
- Used tools like Python, R, SQL for data manipulation and analytics.
- Collaborated with the data science team on optimizing model performance.

Brand Promoter — Byju's Learning App

May 2021-Dec 2021

- Engaged with potential clients to promote and demonstrate the brand's app.
- Effectively communicated product benefits and features to customers.
- Ensured smooth onboarding of new customers onto the app.
- Worked collaboratively with the marketing team to meet promotional targets.

Projects

Emotion Detection

Nov 2024-Jan 2024

Future Optima IT Solutions

- Developed an emotion detection model using NLP and deep learning to classify emotions from text and facial images.
- Utilized NLP libraries (NLTK, spaCy) to preprocess textual data and extract meaningful features for emotion classification.
- Used tools like Hugging Face Transformers, OpenCV, and TensorFlow to process data and build real-time prediction pipelines.

Customer Churn Prediction

Aug'23-April'24

Future Optima IT Solutions

- Implemented a model with 86.52% accuracy on Kaggle's churn dataset with 7043 customer records and 20 features
- Trained the dataset using classification algorithms like Logistic Regression, Decision Tree, Random Forest and XGBoost
- Addressed class imbalance using SMOTE and hyperparameter tuning through Grid Search with K-Fold Cross Validation

SmartFace Market

Feb 2024-June 2024

MES College Of Engineering

- Developed SmartFace Market, a platform integrating admin, user, and staff modules for product management and customer engagement.
- Implemented facial recognition technology to automatically award loyalty points to customers based on their shopping activity.
- Designed a recommendation system that suggests products to users based on their purchase history and preferences.
- Used Python, machine learning libraries, and facial recognition APIs to build core functionalities.

Data Groom: Data Preprocessing CLI

Sep 2023-Jan 2024

MES College Of Engineering

- Implemented a model with 86.52% accuracy on Kaggle's churn dataset with 7043 customer records and 20 features
- Trained the dataset using classification algorithms like Logistic Regression, Decision Tree, Random Forest and XGBoost
- Addressed class imbalance using SMOTE and hyperparameter tuning through Grid Search with K-Fold Cross Validation

Technical Skills

- Artificial Intelligence and Machine Learning : Developing Ai models using ML algorithms, NLP, LLM, Gen Ai
- Frameworks/Libraries : NumPy, Pandas, Django, Matplotlib, Seaborn, TensorFlow, Keras, Scikit-Learn
- Web Technologies : HTML, CSS, React
- Data Science : Machine Learning, Data Analysis and exploration, Predictive model
- Programming Languages : Python, SQL, R
- Databases : MySQL, MongoDB, PostgreSQL
- Analytical skills : Tableau, PowerBI

Soft Skills

- Emotional Intelligence : Excellent interpersonal skills with the ability to empathize and foster positive, collaborative working environments.
- Attention to Detail : Thorough and meticulous in ensuring accuracy and precision in all aspects of data analysis and project execution.
- Team Collaboration : Proven ability to work effectively in cross-functional teams, contributing to collective goals while maintaining a strong sense of individual responsibility
- Adaptability : Quick to learn new tools, technologies, and methodologies to stay current in the fast-evolving AI and data science fields.
